PRAVEEN SAHU

Android Software Engineer | SDE 1

Bangalore, India • +91 9993041091 • Praveen.sahu7512@gmail.com

Portfolio: praveen7512.github.io/portfolio • LinkedIn • GitHub • LeetCode

SUMMARY

Android Software Engineer with 2+ years of experience building and scaling consumer experiences at Swiggy Instamart (5 million DAU). Hands-on expertise in Kotlin, Jetpack Compose, Coroutines, Flow, Retrofit, Room and MVVM, with a focus on reusable component design, backend-driven UI, native Android migrations and performance optimization.

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript

Android: Jetpack Compose, Android SDK, MVVM, Coroutines, Flow, Retrofit, Room, Firebase, Dagger Hilt, Kotlinx Serialization

Architecture & APIs: Multi-module Architecture, REST APIs, WebSockets, Socket.IO, WebRTC, JS Bridge

Tools: Git, GitHub, Linux, Figma

PROFESSIONAL EXPERIENCE

SDE 1 – Android | Swiggy Instamart (5 million DAU) **Jul 2025 – Present**

- Built the reusable Festive OIC component for festival campaigns, improving UI consistency and cutting duplicated implementation effort.
- Designed and implemented the Android contract for the Recipe page, enabling recipe-driven shopping journeys.
- Contributed to AI Conversational Search with interactive search-bar animations and a custom gradient-text rendering component.
- Shipped Auto Add-to-Cart, Cart Auto-Sync, Browsable Query tabs, Wishlist entry points and animations, and Collection banner timers.
- Enabled Fraud JS bridge calls to restrict gallery access for flagged users; migrated selected modules from Gson to Kotlinx Serialization.
- Made SRP filters backend-driven and optimized SRP payload/API response handling, reducing processing latency by ~100 ms.

ASDE – Android | Swiggy Instamart **Jul 2024 – Jul 2025**

- Led the MXN and Collection-page migration to native Android, improving maintainability and native user experience.
- Implemented Ratings updates across Account and Track pages, including a reusable rating component.
- Developed reusable OICv2 and Category Widget components and added PDP badge support to improve visibility and engagement.

EARLIER EXPERIENCE

Android Engineer Intern | Cessini

- Migrated the app to a multi-module MVVM architecture.
- Built chat-room and video-calling features using Socket.IO and WebRTC.
- Implemented Room persistence and performance improvements.

Android Developer Intern | Tech ReInvented

- Built Android UI and core functionality; integrated AdMob, Chronometer, Firebase, Room and REST APIs using Retrofit.

SELECTED PROJECTS

Video Notes Generator (Kotlin, Jetpack Compose, FastAPI, OpenAI APIs, YouTube API): generates lecture notes, summaries and question papers from video lectures.

TheCollegeApp (Jetpack Compose, Hilt, Flow, Firebase, Retrofit, Voyager, MVVM, Jsoup): student app for notices, notes and news.

News API (Node.js, Express.js, PostgreSQL, Redis, Prisma, BullMQ): JWT authentication, CRUD, caching, pagination, logging and rate limiting.

StudyNotion (Node.js, Express.js, MongoDB, Cloudinary, JWT, Mongoose, Razorpay): ed-tech backend for authentication, courses and payments.
